BOOK WORM

"I wanted to design a space-saving and modern storage piece where books could recline naturally without causing damage to the spines [as conventional bookshelves can do]," says SF-based furniture designer Todd Laby of his latest piece, the Slim Slant table (\$1,950). The angular, eco-friendly table—it's made with bamboo—sits on aluminum legs and measures 60 by 18 inches.

Available at Find, 425 Hayes St., 415-701-7100.
